10. STABILITY AND REACTIVITY

Incompatible materials: Product may be affected by acids, bases and strong oxidizers. No hazardous reactions are expected under normal industrial use.

Dangerous products resulting from decomposition: When heated it may release toxic fumes. Carbon monoxide, carbon dioxide acrolein, ketones, aldehydes and other unidentified organic compounds may be emitted upon combustion.

11. TOXICOLOGICAL INFORMATION

Not applicable.

12. ECOLOGICAL INFORMATION

Destination and effects on the environment: Not established.

13. DISPOSAL CONSIDERATIONS

Waste elimination: If unused it should be incinerated in a closed burner, or used as fuel in controlled systems.

Burning should comprise all applicable legal aspects. In certain types of cleanup applications the nature of the material recovered will classify the resulting spent material as a hazardous component. In such instances the material should be disposed via an approved hazardous waste disposal service and the appropriate manifesting obtained.

14. TRANSPORT INFORMATION

Not regulated.

15. REGULATORY INFORMATION

Comply with all national provisions that may apply.

16. OTHER INFORMATION

The data on this Safety File are based on available information at the time of compilation.

They describe the product merely in terms of health and safety requirements, whereby they should not be construed so as to warrant specific properties of the product.
